

Instructions for pairing Vaaká with Suunto Ambit

Hi Brendan

Thanks for your help this morning. I managed to get it going! Here are the instructions in case you want to add them to your website:

1. Use **Movescount** website, select Gear and then Ambit
2. Create a new activity and select “Cadence” as a field
3. Select “Showed advanced settings”
4. Select “Cadence POD”
5. Save
6. Save the changes to your Ambit via a sync
7. Go into Settings on your Ambit, select “Pair”
8. Select “Cadence POD”
9. Pair
